Dear Ms Arnold,

Thank you for your letter of 28 April 2006 expressing the opinion of the Danish Parliament's Health Committee, as endorsed by its Europe Committee, on the European Commission's Green Paper on "Improving the mental health of the population". The opinion will of course be taken seriously into account when the Commission will prepare the forthcoming communication on mental health on the basis of the results of the public consultation carried out via the Green Paper.

I fully agree that it is of the utmost importance to maintain and further the highest possible standards of care in this area throughout the European Union.

Yours sincerely,

Ms Elisabeth Arnold
