## **REGULATORY SCRUTINY BOARD OPINION**

Anti-money Laundering Package

{COM(2021) 420-423} {SWD(2021) 190-191}

Brussels, RSB

## <u>Opinion</u>

### Title: Impact assessment / Anti-money laundering package

### **Overall opinion: POSITIVE**

#### (A) Policy context

Money laundering is the processing of criminal monetary transactions in order to appear legitimate. The EU has been combating money laundering and terrorist financing for thirty years. During this time, the EU's regulatory framework has evolved significantly. There have also been international recommendations from the Financial Action Task Force (FATF). Between 0.7 and 1.3% of EU GDP is estimated to involve suspect financial activity. However, only a minor share is detected and only 1% of assets are confiscated.

The Commission revised the anti-money laundering (AML) framework in 2018. However, recent high-profile cases led to an action plan in May 2020, which proposed further action. This impact assessment aims to increase the effectiveness of rules, supervision and enforcement. It will also extend the scope of activities covered.

#### (B) Summary of findings

The Board notes the useful additional information provided in advance of the meeting and commitments to make changes to the report.

The Board gives a positive opinion. The Board also considers that the report should further improve with respect to the following aspects:

- (1) The main body of the report does not present the available political choices pertaining to certain implementing options.
- (2) The report does not sufficiently assess compliance costs and the simplification aspects of the initiative.
- (3) The report is not clear enough about how 'future proof' the preferred option is.

### (C) What to improve

(1) The report should better present the political choices related to certain implementing options developed in the annex (e.g. strengthening the international dimension, interconnection of bank account registers for AML and law enforcement authorities, cash

limits). Available implementing choices should be briefly introduced in the main body of the report, while keeping the substantive analysis in the annexes. The latter should be presented in a more structured way, around the problems, options and their impacts, clearly indicating the preferred way forward.

(2) The report should more clearly present the envisaged simplification measures (REFIT) and the overall impacts on compliance costs. This should involve a better identification of costs and differentiation according to type of remunerators. Costs (and benefits) should be quantified to the extent possible and summarised in Annex 3.

(3) The report should more clearly assess the evolving nature of money laundering techniques and how this will challenge the flexibility of the AML framework. The report could highlight how risk scenarios will be updated and how this will direct the scope and depth of supervision. The report should clarify who will be responsible for the updates and the development of the risk assessment tools.

(4) The policy context could be improved by stressing more clearly the distinction between prevention and enforcement. The report should clarify how better prevention can help law enforcers focus on the most relevant cases and build better cases.

(5) The report should clarify to what extent it follows the advice of the European Banking Authority and the recommendations of the FATF.

The Board notes the estimated costs and benefits of the preferred option(s) in this initiative, as summarised in the attached quantification tables.

Some more technical comments have been sent directly to the author DG.

#### (D) Conclusion

The DG may proceed with the initiative.

The DG must take these recommendations into account before launching the interservice consultation.

#### ANNEX – Quantification tables extracted from the draft impact assessment report

The following tables contain information on the costs and benefits of the initiative on which the Board has given its opinion, as presented above.

If the draft report has been revised in line with the Board's recommendations, the content of these tables may be different from those in the final version of the impact assessment report, as published by the Commission.

#### SUMMARY OF COSTS AND BENEFITS

Increased effectiveness of AML/CFT rules, consistent supervision across the internal market and efficient exchange of information among FIUs is the main objective of the initiative. This should reduce the quantity of illicit funds which are laundered or used to finance terrorism, either through greater detection or deterrence.

# **OBJECTIVE 1 – STRENGTHEN EU ANTI-MONEY LAUNDERING RULES, ENHANCE THEIR CLARITY AND ENSURE CONSISTENCY WITH INTERNATIONAL STANDARDS**

Preferred Option – Ensure a greater level of harmonisation in the rules that apply to entities subject to AML/ CFT obligations and the powers and obligations of supervisors and FIUs.

# **Objective 2** – Improve the effectiveness and consistency of anti-money laundering supervision

*Preferred Option – Direct supervisory powers over selected risky entities in the financial sector subject to AML/ CFT requirements and indirect oversight over all other entities.*

|  | Direct benefits   |   |  |  |  |  |
| Direct supervision of<br>selected entities by an EU<br>supervisor and indirect<br>oversight over all other<br>entities | For directly supervised entities, especially cross-<br>border groups, advantage of dealing with one<br>single AML/CFT supervisor. | National supervisors would be relieved of<br>the burden of supervising entities selected<br>for direct EU supervision.<br>Supervised entities would benefit from<br>harmonised EU-level supervision, rather<br>than being subject to divergent national<br>approaches |  |  |  |  |

# **OBJECTIVE 3 – INCREASE THE LEVEL OF COOPERATION AND EXCHANGE OF INFORMATION AMONG FINANCIAL INTELLIGENCE UNITS**

Preferred Option – The EU FIUs' Platform to become a mechanism as part of the AML Authority, with power to issue guidance and technical standards and to organise joint analyses and training, carry out trends and risk analysis.
