### 3. Selected specific provisions for the outermost regions in recent EU legislation

EU LEGISLATION (*)	PROVISIONS
<b>Common Provisions Regulation</b> (CPR)	Co-financing rate 85% for all outermost regions, independently of GDP. Increased specific additional allocation of EUR 1.514 billion: - EUR 1.142 billion in ERDF and EUR 372 million in ESF+ (current prices) Retro-activity: investments under EMFAF compensation envelope and ERDF/ESF+ additional allocation can be financed after completion. Higher allocation for technical assistance.
<b>European Regional Development Fund</b> (ERDF)	Additional allocation exempted from thematic concentration requirements. ERDF investments possible for: new airports and their infrastructure; disposal of waste landfill; increasing capacities for residual waste treatment in justified cases; productive investments in enterprises, irrespective of size. Outermost regions considered less developed regions, independently of their GDP, for thematic concentration requirements.
<b>Interreg</b> (European Territorial Cooperation, ETC)	A specific strand of EUR 280 million for outermost regions cooperation with other regions, countries and territories in their neighbourhood. Co-financing rate 85% for outermost regions cooperation projects.
<b>Recovery Assistance for Cohesion and the Territories of Europe</b> (REACT-EU)	Dedicated additional amount of EUR 146.4 million (in 2018 constant prices) in addition to a share of respective national envelopes: - EUR 65.9 million for French outermost regions - EUR 65.6 million for the Canary Islands - EUR 14.9 million for Portuguese outermost regions
<b>Just Transition Fund</b> (JTF)	Calls on Member States to consider the specific situation of their outermost regions in the JTF plans and, when including them in their plans, to provide a specific allocation for them.
<b>European Social Fund +</b> (ESF+)	New specific additional allocation of EUR 372 million (current prices) is to be used for the general ESF+ objectives and is exempted from requirements to allocate a specific percentage to thematic areas. In general, 12.5% of ESF+ funding is to support youth employment, vocational education and training in outermost regions with a rate of young people not in employment in education or training above EU average (all OR).
<b>European Maritime, Fisheries and Aquaculture Fund</b> (EMFAF)	Earmarked budget of EUR 315 million (current prices, same as in 2014-20) for compensation of additional costs and for structural investment: - EUR 131 million for French outermost regions - EUR 102 million for Portuguese outermost regions - EUR 82 million for the Canary Islands Outermost regions can allocate up to 60% of budget on compensation, up to 70% if justified. Compensation measures receive 100% EU financing. Commission reports on implementation of outermost regions related measures.

<p><i>Programme d'Options Spécifiques à l'Éloignement et l'Insularité –</i>  <b>Programme of Options Specifically Relating to Remoteness and Insularity</b>  <b>(POSEI)</b></p>	<p>POSEI: EUR 653 million (in current prices) per year in 2021-27 (same as in 2014-2020) for the supply of essential agricultural products and support to local agricultural production:</p> <ul style="list-style-type: none"> <li>- EUR 278.4 million/year for French outermost regions</li> <li>- EUR 106.2 million/year for Portuguese outermost regions</li> <li>- EUR 268.4 million/year for the Canary Islands</li> </ul>
<p><b>European Agricultural Fund for Rural Development</b>  <b>(EAFRD)</b></p>	<p>Co-financing 85% for outermost regions that are less developed regions and 80% for remaining outermost regions.</p> <p>Higher sectorial co-financing rates.</p> <p>Exemptions from various obligations.</p> <p>Member States must assess outermost regions situation in shaping their CAP strategic plans.</p>
<p><i>L'Instrument Financier pour l'Environnement –</i>  <b>Programme for Environment and Climate action</b>  <b>(LIFE)</b></p>	<p>Special regard for projects in geographical areas with specific needs or vulnerabilities: specific environmental challenges; natural constraints; trans-border areas; areas of high natural value or outermost regions.</p> <p>Support to small projects for protecting outermost regions biodiversity and ecosystems.</p>
<p><b>Connecting Europe Facility</b>  <b>(CEF)</b></p>	<p>Specific provisions to support transport, energy and digital projects in outermost regions with 70% co-financing.</p> <p>Award criteria to take into account cross-border dimension, network integration and territorial accessibility projects, including for outermost regions and islands.</p> <p>Connections to airports, ports, urban nodes are eligible for funding.</p>
<p><b>Digital Europe Programme</b>  <b>(DEP)</b></p>	<p>Contribute to greater connectivity and better digital skills in the outermost regions.</p> <p>Balanced geographical distribution including bridging digital divide, outermost regions to be taken into account in award criteria.</p> <p>Specific entities to cover outermost regions' needs to be set up locally.</p>
<p><b>Erasmus+ and European Solidarity Corps</b></p>	<p>Should take into account outermost regions specificities and seek to increase their participation.</p> <p>Higher financial support for outermost regions' participants.</p>
<p><b>Horizon Europe</b></p>	<p>Opens 'Widening Participation and Spreading Excellence' actions to all outermost regions to share expertise to help them capitalise on their assets.</p> <p>Covers important topics for the outermost regions: tropical diseases; biodiversity; blue economy; renewable energy; combating climate change.</p>
<p><b>Asylum, Migration and Integration Fund (AMIF)</b>  <b>Integrated Border Management Fund (IBMF)</b>  <b>Internal Security Fund (ISF)</b></p>	<p>Encourages Member States to ensure that national programmes address the specific challenges outermost regions face, in particular situations of migratory pressure.</p>
<p><b>Neighbourhood, Development and International Cooperation</b></p>	<p>Encourages cooperation between outermost regions and overseas countries and territories; enables joint programming Global Europe/Interreg.</p>

<b>Mechanism (NDICI – Global Europe)</b>	
<b>Creative Europe</b>	Outermost regions’ specificities should be taken into account and their contribution to cultural diversity should be valued.
<b>InvestEU</b>	Encourages Member States to use part of the national compartment in addressing market failures, e.g. in the outermost regions.
<b>Overseas Countries and Territories (OCT) Decision</b>	Encourages cooperation between overseas countries and territories, neighbouring African, Caribbean and Pacific (ACP) and/or non-ACP states or territories and the outermost regions, as well as with regional bodies.
<b>EU Space Programme</b>	The Azores, Madeira and the Canary Islands are to be included in the European Geostationary Navigation Overlay Service.  Can support adaptations to space ground infrastructure.
<b>Citizens, Equality, Rights and Values Programme</b>	Seeks to promote greater sense of belonging to the EU in the outermost regions and the Union values.
<b>Single Market Programme</b>	Should address the specific needs of the outermost regions.  Can finance phytosanitary programmes for the control of pests in the outermost regions.
<b>Octroi de mer – Dock dues in the French outermost regions</b>	Reduced taxation for certain locally produced products and categories of products; higher level of taxation for products “imported” from outside the region, including from mainland France; the tax differential between local and “imported” similar products is up to 20% or 30% in Guadeloupe, French Guiana, Martinique, Mayotte and Réunion.  Local economic operators with an annual turnover below EUR 550 000 are not subject to dock dues.
<b>Tax on Imports and Deliveries of Goods in the Canary Islands (AIEM)</b>	Reduced taxation for certain locally produced products and categories of products; and higher level of taxation for “imported products” applies with a tax differential of up to 15%.  Total fiscal advantage resulting from AIEM is limited to EUR 150 million per year with possible exemptions in justifiable cases.
<b>Reduced excise duties on certain alcoholic products in the Portuguese outermost regions</b>	Certain locally produced alcoholic products benefit from a reduced excise duty of 75% if purchased locally and of 50% if purchased in mainland Portugal.
<b>Reduced rate of indirect taxes on traditional rum in certain French outermost regions</b>	Traditional rum from Guadeloupe, French Guiana, Martinique and Réunion benefits from a reduced taxation of maximum 50% (both excise duties and tax contribution on alcoholic beverages) when purchased in mainland France.  Total fiscal advantage is limited to an annual quota of 153 000 hectolitres of pure alcohol.
<b>Suspension of autonomous Common Customs Tariff duties into the Canary Islands</b>	Common Customs Tariff duties for selected capital goods for commercial or industrial use and limited quantities of certain fishery products into the Canary Islands do not apply.

(\* *Non-exhaustive list*)

### Economic structure of Guadeloupe, % GDP, 2020

Source: CEROM (France)

### Assets

- **Strategic location:** proximity to the US, South America and Caribbean countries and territories
- **Health:** new university hospital to be completed in 2023, due to attract medical staff
- **Environment and biodiversity:** geothermal potential; exceptional biodiversity; and large forests covering nearly half of the territory
- **Agriculture:** important banana, sugar and rum productions
- **Transport:** largest airport of the French outermost regions, well connected with Europe and the Americas; and major maritime port and hub in the Caribbean basin

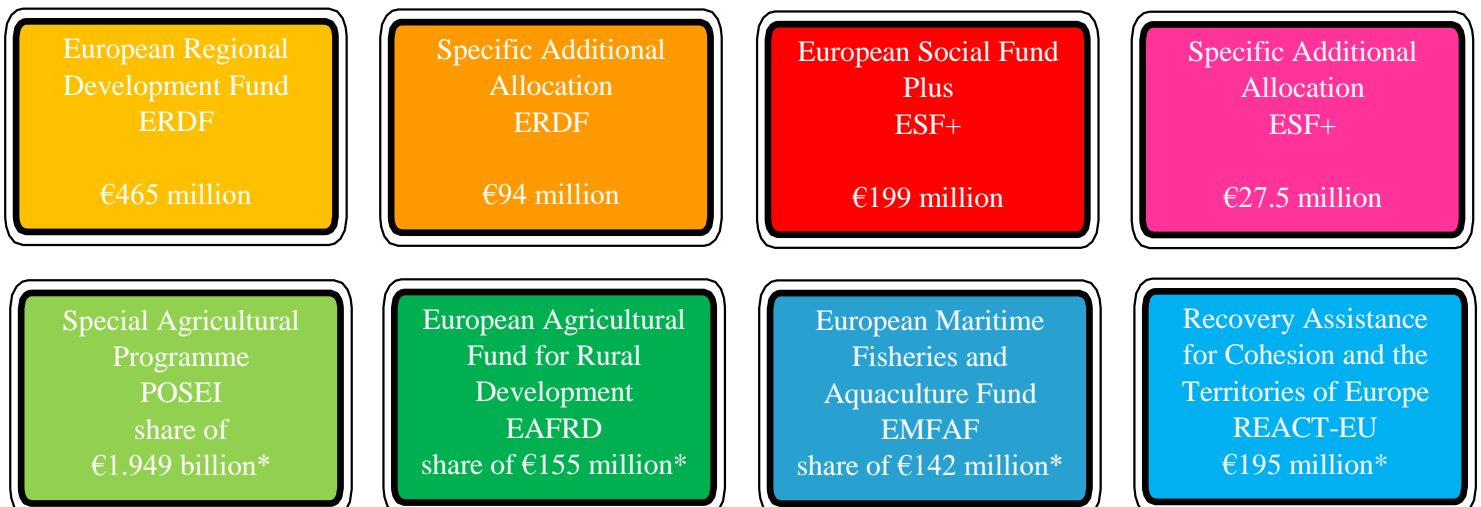

### Challenges

- **Demography:** high share of youth emigration; shrinking population and ageing (forecast to become one of the French regions with the highest share of elderly people within 20 years)
- **Poverty and social exclusion:** high level of poverty (one third of the population lives below the poverty threshold)
- **Vulnerable people:** high rate of young people neither in employment nor in education and training (almost double of the national average)
- **Education:** high illiteracy and early school leaving (double of the national average)
- **Employment:** high unemployment (double of the national average) and only half of the population is employed
- **Health:** limited healthcare system capacity and chlordecone contamination
- **Agriculture:** dependency on a few products for export (e.g. banana, sugar) and on imported food products
- **Digital:** internet connectivity is lower than the French national average

### Focus areas

- **Basic needs:** provision of education, healthcare, transport, telecommunications, water and waste management (e.g. through improved infrastructure, as needed); and development of natural disaster resistant infrastructure
- **Vulnerable people:** ensure adequate care of the ageing population
- **Education:** test educational models to increase achievement (e.g. digitally oriented teaching methods), improve access to digital tools and create opportunities for young people e.g. support skills development among young entrepreneurs
- **Employment:** test inclusion initiatives (e.g. social benefit schemes) and labour market activation methods;
- **Environment and biodiversity:** protect biodiversity; develop sustainable forestry and mitigate exposure to the impacts of climate change; explore geothermal potential
- **Economy:** further diversify the economy
- **Tourism :** enhance sustainable tourism, including blue tourism
- **Agriculture:** diversify agriculture sector, build on local resource and modernize food production to reduce the environmental footprint and improve food autonomy
- **Energy:** increase use of renewable energy, promote energy prosumerism (local production and consumption from renewable sources)
- **Transport:** explore airport and ports' potential as regional hubs and modernise their infrastructure
- **Regional cooperation:** further co-operation with neighbouring countries and territories

### Earmarked EU funding 2021-2027<sup>5</sup>

<sup>5</sup>

\*POSEI/EMFAF amount is divided amongst the French outermost regions. EAFRD amount extrapolated based on EAFRD amounts deducted for 2021-2022 & shared with Saint-Martin. REACT-EU 2022 tranche extrapolated based on REACT-EU 2021 tranche.

# FRENCH GUIANA

288 086 7 000 km 83 751 km<sup>2</sup>

## At a glance

- Largest outermost region in terms of surface
- Gross Domestic Product/capita (PPP) stands at 46% of EU-average\*
- Unemployment rate doubles French and EU averages\*\*
- Rate of young people neither in employment nor in education and training (NEET) is three times higher than French and EU averages\*\*
- Human resources in science, as a % of active population, is above 30% and is almost as high as EU average\*\*
- Fertility rate is one of the highest in the EU (3.73)\*\*

## Economic structure of French Guiana, % GDP, 2018

Source: INSEE (France)

### Assets

- **Strategic location:** French Guiana is - by far - the largest outermost region, with a surface comparable with that of Portugal; largest French department; located in South America; and neighbouring Suriname and Brazil
- **Demography:** young population; important linguistic and cultural variety; and rich indigenous cultures
- **Environment and biodiversity:** 95% of territory is covered with forest (including precious woods); very rich biodiversity; and important water resources and gold mines
- **Tourism:** important potential for sustainable nature tourism
- **Energy:** 70% of generated electricity comes from renewable energy
- **Space:** strategic space infrastructure (the only satellite launch facility of the EU), with important potential for astrophysics development
- **Research and innovation:** human resources in science above 30% of active population

### Challenges

- **Geography:** large territory with high population density in the coastal area and isolated and dispersed small communities across the territory; lack of accessibility linked with lack of transport infrastructure
- **Demography:** very high rate of young people neither in employment nor in education and training (three times the French national average, the highest in the French outermost regions)
- **Poverty and social exclusion:** high poverty, including children poverty, aggravated by irregular migration from neighbouring countries
- **Education:** difficult to access education services; high share of the population with low educational attainment (the rate of people with less than lower secondary education is almost three times the national average); and high risk of illiteracy
- **Employment:** low employment rate, affecting in particular the youth
- **Health:** lack of access to health services for a significant part of the population
- **Economy:** no convergence on purchasing power standards per inhabitant over the last years (49% of EU average in 2015 versus 46% of EU average in 2020)
- **Digital:** internet connectivity is lower than French national average
- **Migration:** irregular migration makes it difficult to know exact number of inhabitants

## Focus areas

- **Basic needs:** provision of education, healthcare, transport, telecommunications, water and waste management in particular in isolated areas (e.g. through infrastructure, as needed), including road transport to link isolated areas
- **Poverty and social exclusion:** foster access to education and healthcare and measures to reduce poverty and social exclusion of isolated populations
- **Education:** reinforce measures to reduce early school leaving ;increase students' and teachers' mobility
- **Employment:** reinforce vocational and educational training including by fostering upskilling and reskilling opportunities to improve employability
- **Environment and biodiversity:** develop products from bio-resources for pharmacology and cosmetics
- **Economy:** further diversify and formalize the economy
- **Agriculture:** modernise agriculture and forestry exploitations; increase food production; and develop further the sustainable wood value chain
- **Digital:** invest in digitalising the private sector (e.g. with support to small businesses to invest in digital infrastructure and in developing digital skills)
- **Research and innovation:** develop assets (e.g. in blue economy, space, renewable energy)
- **Regional cooperation:** strengthen co-operation with neighbouring countries and territories, act as entry point of South American products into the EU
- **Migration:** increase capacity to manage irregular migration

## Earmarked EU funding 2021-2027<sup>6</sup>

### Economic structure of Martinique, % GDP, 2020

Source: CEROM (France)

### Assets

- **Strategic location:** proximity to the US, South America and other Caribbean countries and territories
- **Environment and biodiversity:** geothermal potential; rich biodiversity; and important maritime zone with high potential for blue economy
- **Tourism:** important tourism sector
- **Agriculture:** important banana and rum production, with potential to diversify and increase production
- **Economy:** relatively high standard of living (among the highest in the Caribbean basin)

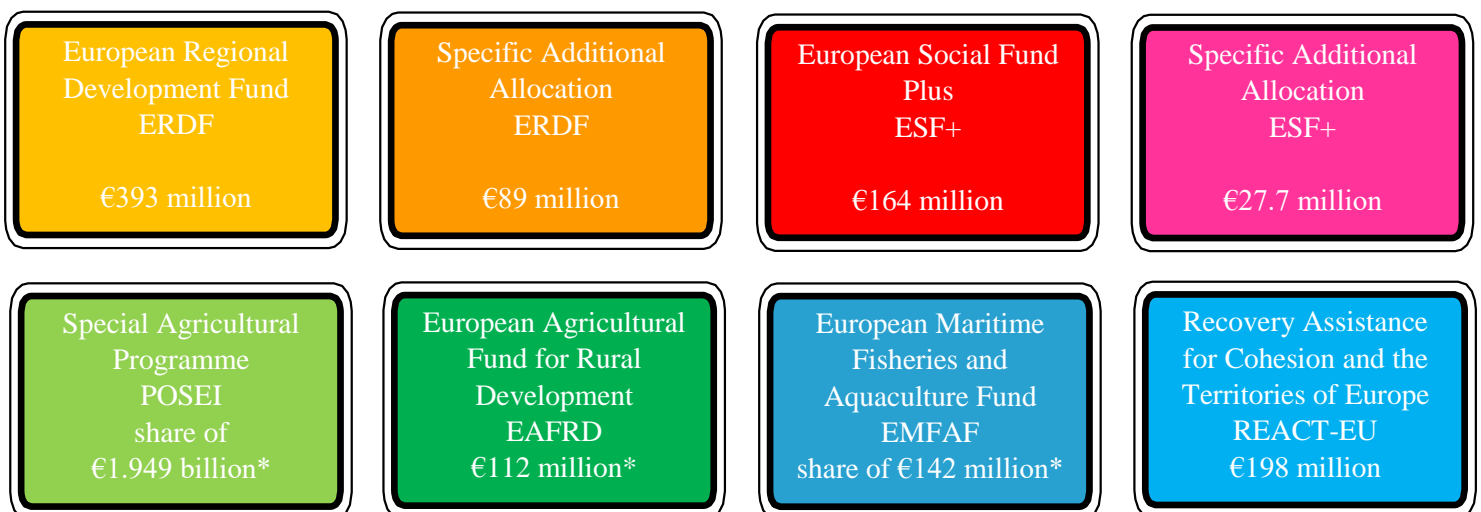

### Challenges

- **Demography:** forecast to become one of the French regions with the highest share of elderly people within 20 years; many young people leave the region and do not return; and insufficient capacity to care for the elderly
- **Poverty and social exclusion:** high level of poverty, with the proportion of households benefiting from solidarity income is almost four times higher than the French national average
- **Education:** low level of young graduates and high levels of youth exodus
- **Employment:** significant proportion of low-skilled jobs and youth unemployment rate almost the double of national average
- **Health:** chlordecone contamination
- **Economy:** uneven territorial distribution of economic activities and need to increase support for local SMEs (linked with EU funding)

## Focus areas

- **Basic needs:** provision of education, healthcare, transport, telecommunications, water and waste management (e.g. through infrastructure, as needed, with a focus on water infrastructure)
- **Poverty and social exclusion:** implement inclusion initiatives (e.g. social benefit schemes) and support measures to reduce poverty
- **Vulnerable people:** create opportunities for young people to prevent brain drain and support return of young professionals
- **Economy:** further diversify the economy; improve competitiveness, business research and innovation, and digital transformation
- **Employment:** reinforce vocational and educational training; foster upskilling and reskilling opportunities to improve employability
- **Tourism :** enhance sustainable tourism, including blue tourism
- **Agriculture:** support young farmers; modernise the sector to improve food autonomy; diversify beyond banana and sugar crops; and improve quality and availability of land
- **Transport:** improve and modernise transport
- **Digital:** increase access to digital tools (e.g. grants to purchase digital equipment) and test digitally oriented teaching methods
- **Research and innovation:** support entrepreneurship and start-ups by facilitating access to finance and investing in modernization of regional assets (e.g. pilot sustainable fishing methods and develop aquaculture)
- **Regional cooperation:** further co-operation with neighbouring countries and territories

### Economic structure of Mayotte, % GDP, 2018

Source: INSEE (France)

### Assets

- **Strategic location:** proximity to Eastern Africa and Mozambique Channel
- **Demography:** very young and growing population (around 70% under the age of 30)
- **Environment and biodiversity:** rich biodiversity and third largest lagoon in the world (only one with a double-barrier coral reef)
- **Tourism:** important tourism potential, including whale watching
- **Agriculture:** important dimension of arable land for agriculture

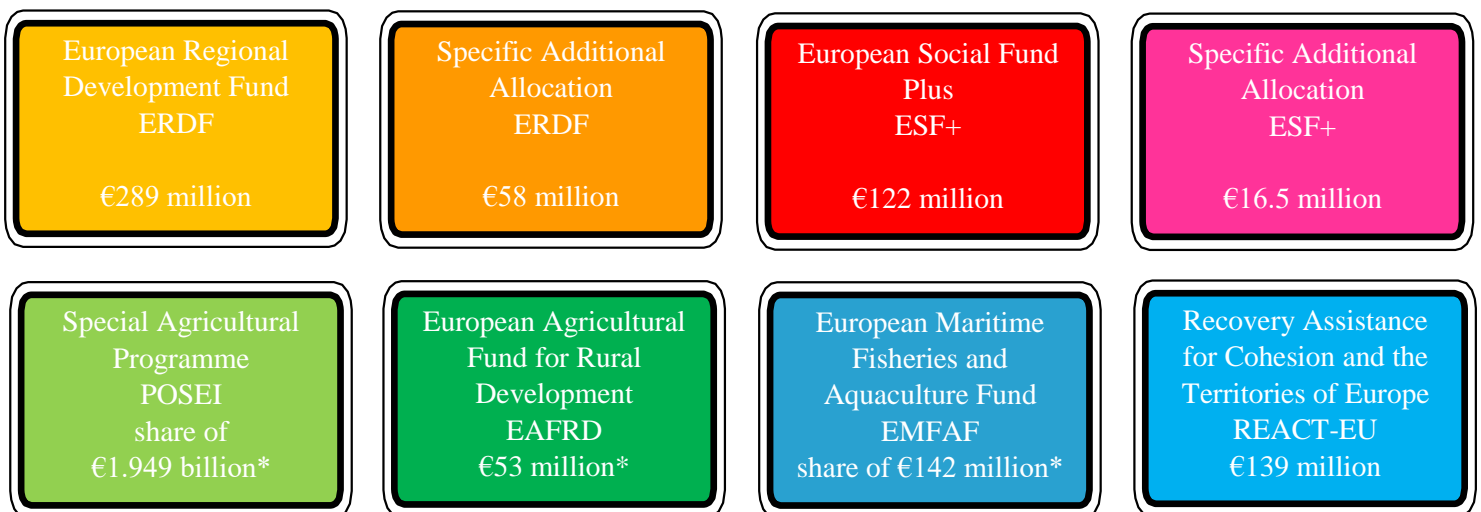

### Challenges

- **Basic needs:** extensive lack of access to basic needs including housing, water, sanitation, healthcare, education; lack of basic health, education and transport infrastructure; and absence of public transport network
- **Demography:** the highest EU birth rate and high irregular migration lead to constantly increasing need for basic infrastructure (e.g. schools, hospitals, housing)
- **Poverty and social exclusion:** extremely high level of poverty; three quarters of the population live below the poverty threshold
- **Education:** low educational attainment and lack of teachers
- **Employment:** very low employment rate (less than half the French national average); very high unemployment (the highest in the EU); the youth unemployment rate is almost three times the national average; very high long-term structural unemployment
- **Economy:** uneven territorial distribution of economic activity (concentrated in the eastern part of the territory); extensive informal economy
- **Digital:** lack of digital infrastructure, equipment and skills

## Focus areas

- **Basic infrastructure:** focus on the provision of housing, sanitation, education, healthcare, transport, telecommunications, water and waste management (through extensive investment in basic infrastructure, in particular education, healthcare and transport infrastructure); and develop natural disaster resistant infrastructure
- **Poverty and social exclusion:** develop measures to reduce poverty and exclusion
- **Vulnerable population:** create opportunities for young people (e.g. hiring grants for companies, training courses, and apprenticeships) and align skills development with market needs
- **Education:** enhance educational capacity and skills of population
- **Employment:** reinforce vocational and educational training and foster upskilling and reskilling opportunities to improve employability
- **Economy:** further diversify the economy; facilitate the integration of the informal economy into the formal economy; and validate skills acquired in the informal economy
- **Agriculture:** reduce food import dependency by exploring agriculture potential and increasing farmers' income; invest in food security
- **Research and innovation:** support start-ups (e.g. access to finance, business advisory services); support businesses' digital transition; promoting the use of digital tools
- **Regional cooperation:** further co-operation with neighbouring countries and territories
- **Migration:** increase capacity to manage irregular migration

### Economic structure of Réunion, % GDP, 2020

Source: CEROM (France)

### Assets

- **Demography:** very young population (over one third is younger than 20 years)
- **Environment and biodiversity:** geothermal potential; rich biodiversity with a very high rate of endemic species; forest covers 40% of the island
- **Tourism:** safe destination with good health infrastructure, which is important for tourist trust
- **Agriculture:** important sugar cane production, which can be used as a biomass energy source
- **Transport:** expansion of the Roland Garros Airport and “Grand Port Maritime” as strategic Indian Ocean hub (fourth largest French port)
- **Energy:** around 36% of generated electricity comes from renewable energy
- **Digital:** % of households with broadband access to the internet is almost the same as in France

### Challenges

- **Demography:** high rate of young people neither in employment nor in education and training (more than double of the French national average)
- **Poverty and social exclusion:** high poverty rate (one in ten people live under the poverty threshold), well above the double of the French national average
- **Education:** high early school leaving (second highest in French outermost regions, double of the French national average); share of population with less than secondary education is high (more than double of the French national average)
- **Employment:** high general and youth unemployment rate (both more than double of the French national average)

## Focus areas

- **Basic needs:** provision in particular of transport, water and waste management (e.g. through infrastructure, as needed); and develop natural disaster resistant infrastructure
- **Poverty and social exclusion:** support measures to reduce poverty and promote the social economy
- **Education:** strengthen measures to prevent early school leaving and promote access to upskilling and reskilling opportunities
- **Employment:** improve employability through training and mobility of students' and teachers
- **Economy:** diversify the economy
- **Tourism:** diversify tourism and develop sustainable, nature-based tourism
- **Agriculture:** foster agricultural and agro-food research and innovation; promote and export local products; and enhance research in tropical bio-economy solutions
- **Transport:** further improve connectivity and accessibility
- **Energy:** increase the share of renewable energy use
- **Digital:** promote digital solutions and infrastructure
- **Regional cooperation:** further co-operation with neighbouring countries and territories

53 km<sup>2</sup>

## At a glance

- Located in the Caribbean in the same island as the overseas country and territory of Sint-Maarten
- Fragile labour market, high share of the population without tertiary education and a high poverty rate
- Approximately 50% of the regional population aged 15 years or older does not have a diploma or at most, a high school diploma
- Exclusive maritime economic zone: 1 066 km<sup>2</sup>\*\*\*

\*\*\*11 691 000 km<sup>2</sup> for France

Source: IEDOM, France

Source: IEDOM, France

## Assets

- **Strategic location:** proximity to the US, South America and other Caribbean countries and territories; located in the same island as Sint Maarten (an Overseas Country and Territory of the Netherlands); and with a transport hub in the area
- **Demography:** most of its population speaks both English and French; and one third of total population is younger than 20 years
- **Tourism:** developed tourism industry (main sector of activity) with tourists from both EU and US

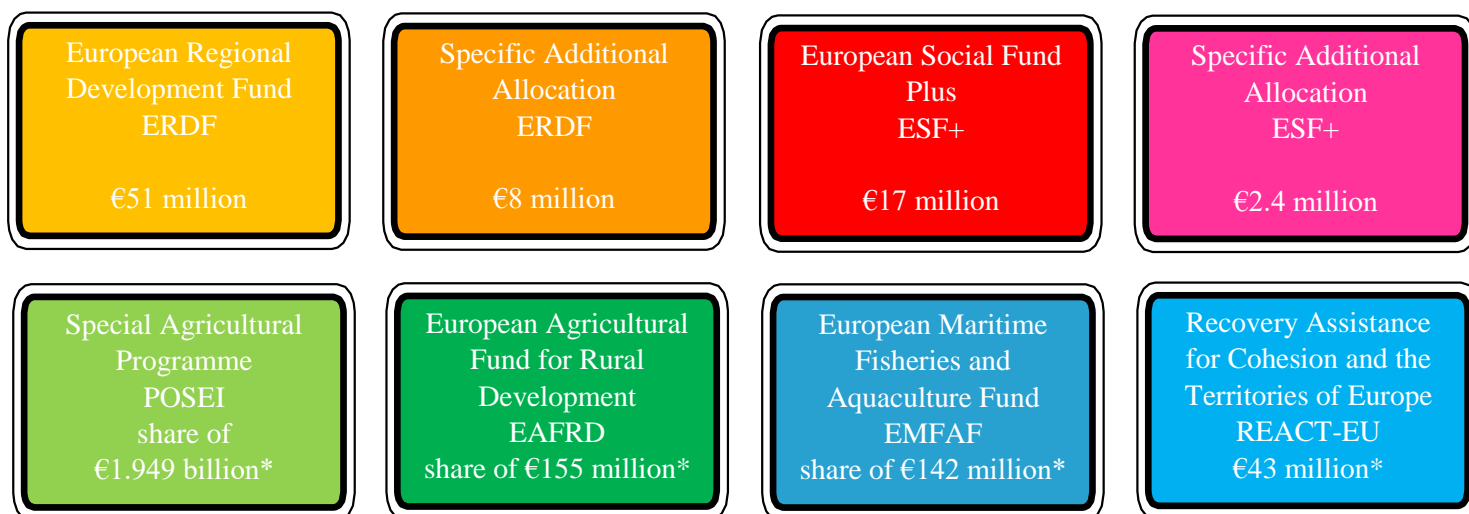

## Challenges

- **Reconstruction/infrastructure:** high exposure to extreme weather events, and major challenges in terms of reconstruction of the island since the Irma hurricane in 2017
- **Poverty and social exclusion:** high poverty rate, with high share of the population relying on social support (around 60% versus 47% at French national level)
- **Education:** low rate of participation in education, with less than 25% of people aged 18-24 in education (52% at French national level); and low education level (36 % of people aged 30-39 do not hold a degree, compared to 15% at French national level)
- **Employment:** very high unemployment rate; only half of people aged 15-64 indicates being in employment (French national average is 65%)
- **Digital:** insufficient internet access
- **Migration:** high share of irregular migration (estimated at one third of the population)

## Focus areas

- **Basic needs:** provision of education, healthcare, transport, telecommunications, water and waste management (e.g. through infrastructure, as needed); and develop natural disaster resistant infrastructure
- **Employment:** create opportunities for young people to prevent brain drain and facilitate the upskilling and integration in the labour market
- **Economy:** further diversify the economy; facilitate the integration of the informal economy into the formal economy; and develop new business models through digitalisation
- **Tourism:** diversify tourism, making it more sustainable
- **Agriculture:** modernise and green the agriculture; and explore scarce resources (e.g. land, water), while protecting biodiversity
- **Regional cooperation:** further co-operation with neighbouring countries and territories, strengthen cooperation between Saint-Martin and Sint Maarten

### Economic Structure of the Azores, % GDP, 2019

Source: Instituto Nacional de Estatística (Portugal)

### Assets

- **Strategic location:** located in the mid-Atlantic between EU and the US
- **Environment and biodiversity:** geothermal potential; forests and natural vegetation covering one third of the territory; and high variety of endemic species and habitats
- **Tourism:** potential to develop sustainable tourism models and long-term stays
- **Agriculture:** strong agricultural sector; important dairy production; the only EU tea plantations; and ideal setting for testing sustainable farming
- **Space:** space centre in Santa Maria Island
- **Research and innovation:** the only EU region surrounded by deep sea offering a unique research potential and a very large exclusive economic maritime zone

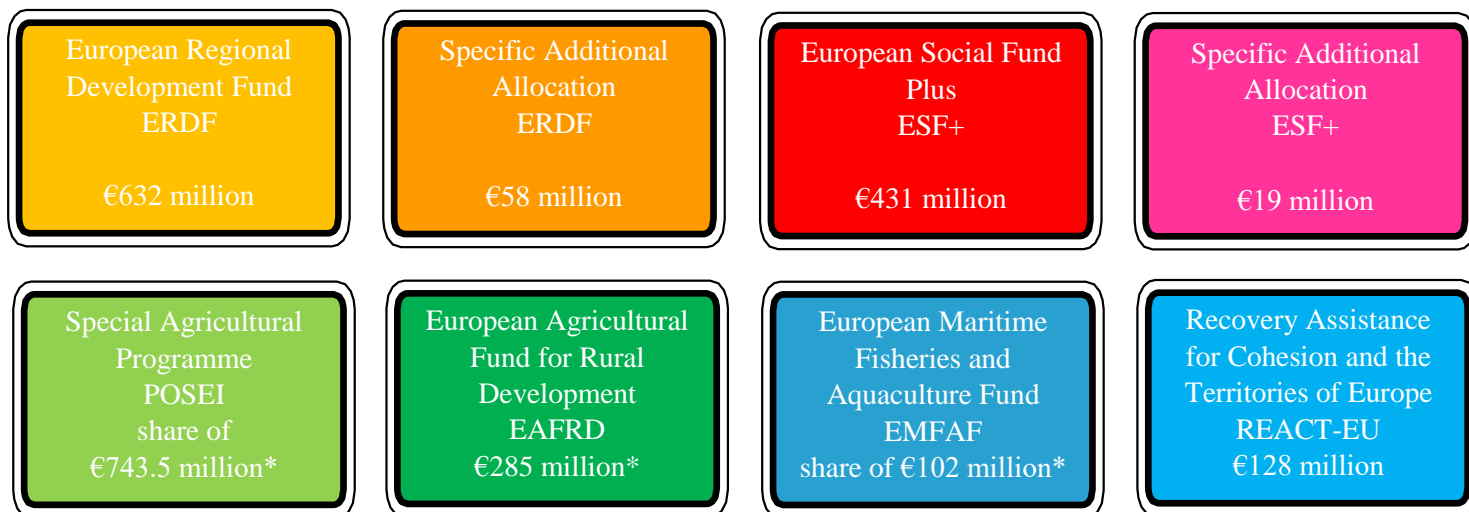

### Challenges

- **Demography:** ageing; high youth emigration; and shrinking population
- **Poverty and social exclusion:** high level of poverty (among the highest in Portugal)
- **Education:** very high rate of early school leaving (three times higher than Portuguese national average), leading to high youth unemployment and a low level of skills
- **Economy:** small scale economy; SMEs' limited capacity to generate (quality) jobs and retain skilled workers; and undeclared temporary and low skilled work
- **Transport:** need to ensure regular, reliable and affordable (aerial/maritime) transport (between the islands of the archipelago and with e.g. Europe)
- **Agriculture:** natural constraints (weather, slopes, altitude) limit the use of land, increasing the cost of agricultural production

## Focus areas

- **Vulnerable people:** secure long-term care and living conditions for the elderly
- **Education:** educational and school retention measures, to improve education outcomes and reduce the number of young people neither in employment nor in education and training
- **Environment and biodiversity:** build climate resilience; further develop sustainable sectors such as eco-tourism; and protect endangered species
- **Economy:** strengthen regional economic fabric by improving competitiveness in the business sector and further diversify the economy
- **Agriculture:** increase farm holdings' competitiveness and support the traditional and environmentally-sustainable agricultural systems and landscapes
- **Transport:** ensure regular and affordable transport (within the archipelago and to and from the region) and develop sustainable transport models for short inter-island travel
- **Digital:** invest in digital infrastructure and digital skills development; promote digital solutions (e.g. telemedicine to improve access to specialised healthcare)
- **Research and innovation:** develop further the Azores as a reference centre for deep sea research (e.g. foster research exchanges) and space innovation
- **International cooperation:** explore international co-operation

<b>GDP</b>	<b>2020</b>	<b>2020</b>	<b>2020</b>
Gross Domestic Product/capita (Purchasing Power Standard - % of EU-27)	69	76	100
GDP/capita at current market prices (EUR)	17 600	19 400	29 900
<b>Population</b>	<b>2020</b>	<b>2020</b>	<b>2020</b>
Median age 2020	43.2	45.5	43.9
Median age projections in 2100	52.8 (+9.6 y)	49.5 (+4.0 y)	48.8 (+4.9 y)
Total population 2020	254 254	10.3 million	447.3 million
Projections total population in 2100	151 245	7.9 million	416 million
Total population projections 2100 as a % total population 2020	59%	77%	93%
<b>Unemployment</b>	<b>2020</b>	<b>2020</b>	<b>2020</b>
Unemployment rate 15-74 (%)	8.1	6.9	7.1
Employment rate 15-64 (%)	65.1	69.0	67.6
Youth unemployment rate 15-24 (%)	-	22.6	16.8
<b>Research</b>	<b>2020</b>	<b>2020</b>	<b>2020</b>
HR in science & technology (% of active population)	25.3	31.0	34.0

## QUALITY OF LIFE INDICATORS

	2020	2020	2020
<b>Access to education</b>	<b>2020</b>	<b>2020</b>	<b>2020</b>
Early leavers from education and training 18-24 (%)	-	8.9	9.9
Young people neither in employment nor in education and training 15-24, NEET (%)	-	9.1	11.1
Tertiary education attainment 25-64 (%)	22.9	28.2	32.8
Less than primary/lower secondary education attainment 25-64 (%)	53.6	44.6	21
<b>Access to ICT</b>	<b>2021</b>	<b>2021</b>	<b>2021</b>
Individuals who used the Internet at least once a week (%)	82	80	-
Households with broadband access to the internet (%)	87	84	90
<b>Access to health</b>	<b>2019</b>	<b>2019</b>	<b>2019</b>
Number of medical doctors per 100 000 inhabitants	442	532	391
Number of hospital beds per 100 000 inhabitants	735	351	532

## Economic structure of Madeira, % GDP, 2019

Source: Instituto Nacional de Estatística (Portugal)

### Assets

- **Environment and biodiversity:** mild subtropical climate; rich biodiversity, with Europe's largest marine protected area; and about 69% of the territory is forest
- **Tourism:** important tourism sector (first sector of activity); substantial share of international tourists; and suited for developing new sustainable tourism models and long-term stays
- **Agriculture:** important banana, wine and tropical fruit productions
- **Digital:** higher percentage of households with broadband access than Portuguese national average

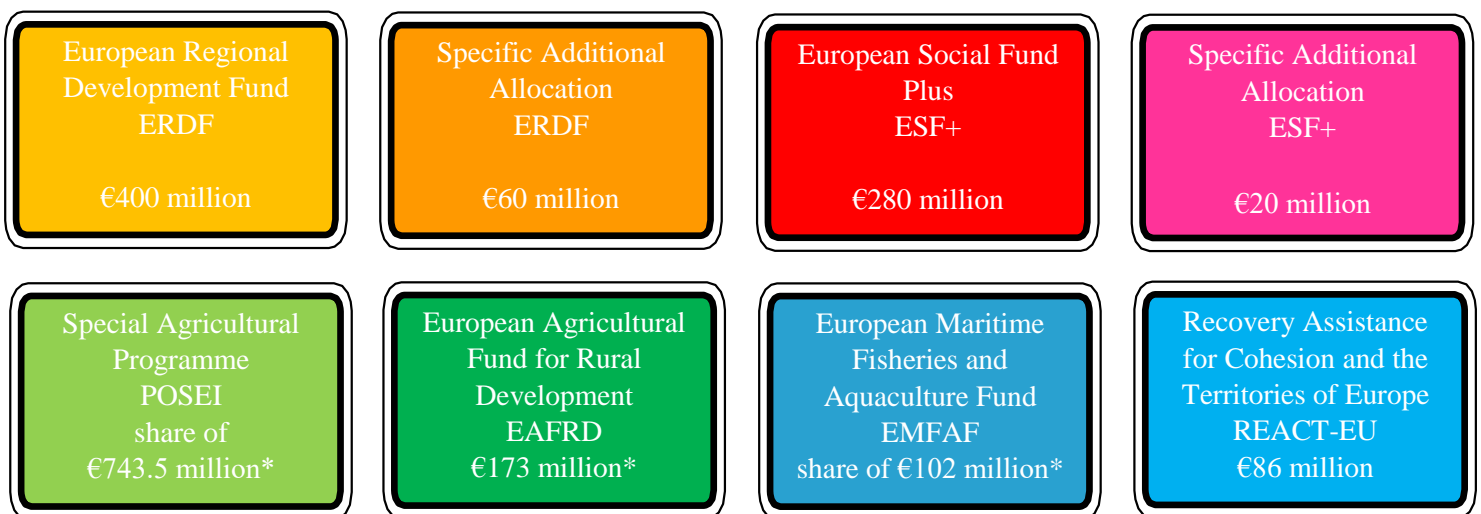

### Challenges

- **Demography:** ageing population; high youth emigration and shrinking population; lack of skilled workforce; and difficulties in retaining skilled workers
- **Poverty and social exclusion:** higher poverty rates than the Portuguese national average
- **Education:** high rate of early school leaving, leading to high youth unemployment, low skilled workforce, and limited opportunities for pursuing higher education and training
- **Environment and biodiversity:** land abandonment, a threat to biodiversity and the environmental sustainability of the region
- **Transport:** higher price of air/maritime transport and ensure adequate coverage of aerial connectivity (linked with importance of tourism sector for Madeira)
- **Agriculture:** most farms are situated in areas with slopes leading to high production costs and intensive labour; and higher prices of agricultural factors of production

## Focus areas

- **Education:** invest further in education and training (e.g. reskilling and upskilling), making greater use of digital tools
- **Employment:** strengthen public services' capacity to counsel jobseekers; pilot social inclusion initiatives (e.g. social benefit schemes);
- **Environment and biodiversity:** protect biodiversity and build climate resilience in areas such as sustainable mobility, circular economy, renewable energies and waste management
- **Economy:** further diversify the economy; strengthen the regional economic fabric by improving business competitiveness and resilience (e.g. through business advisory support services and training)
- **Tourism:** develop further sustainable tourism and nautical tourism (e.g. recreational boating, sailing, diving)
- **Agriculture:** support traditional and environmentally sustainable agricultural systems and landscapes
- **Digital:** encourage digitalisation and support companies providing digital services (e.g. business incubators, support digital skills development)
- **Research and innovation:** strengthen research and innovation activities by optimizing regional assets (e.g. marine technologies, renewable energies and bio economy) and investing in regional smart specialization
- **Regional cooperation:** further co-operation with neighbouring countries and territories

## Earmarked EU funding 2021-2027<sup>12</sup>

<sup>12</sup>

\*POSEI/EMFAF amount is divided amongst the Azores and Madeira. EAFRD amount based on 2023-2027 amounts and amounts deducted for 2021-2022.

# THE CANARY ISLANDS

 2 236 992
  1 100 km
  7 447 km<sup>2</sup>

## At a glance

- Gross Domestic Product/capita (PPP) stands at 62% of EU-average\*
- Unemployment and youth unemployment rates are well above Spanish and EU averages\*\*
- Rate of young people neither in employment nor in education and training (NEET) is well above Spanish and EU averages\*\*
- % of households with broadband access to the internet is higher in the Canary Islands than in Spain\*\*
- Exclusive maritime economic zone: 356 000 km<sup>2</sup>\*\*\*

\* Source: Purchasing power standard (PPP, % of EU-27), Eurostat 2020  
 \*\*Source: Eurostat 2020 \*\*\*1 039 233 km<sup>2</sup> for Spain

Youth unemployment rate (%) (2018-2020) [Source: Eurostat]

Young people neither in employment nor in education and training (NEET, %) (2016-20) [Source: Eurostat]

### Economic Structure of the Canary Islands, % GDP, 2020

Source: Instituto Nacional de Estadística (Spain) / GDP at current market prices: €39.163 million in 2020

### Assets

- **Environment and biodiversity:** rich ecological diversity with unusual contrast of natural landscapes (e.g. forests, deserts and volcanos)
- **Tourism:** important and well-developed tourism sector (the second largest in Spain)
- **Agriculture:** important production of tropical fruits, vegetables and rum
- **Blue economy:** a marine and maritime sector with major development opportunities, including the Oceanic Platform PLOCAN that supports marine research, development and innovation
- **Energy:** el Hierro island as a role model for a high degree of energy self-sufficiency from renewable sources
- **Space:** suitable location and infrastructure for astronomical observation, with the Observatories of the Astrophysics Institute

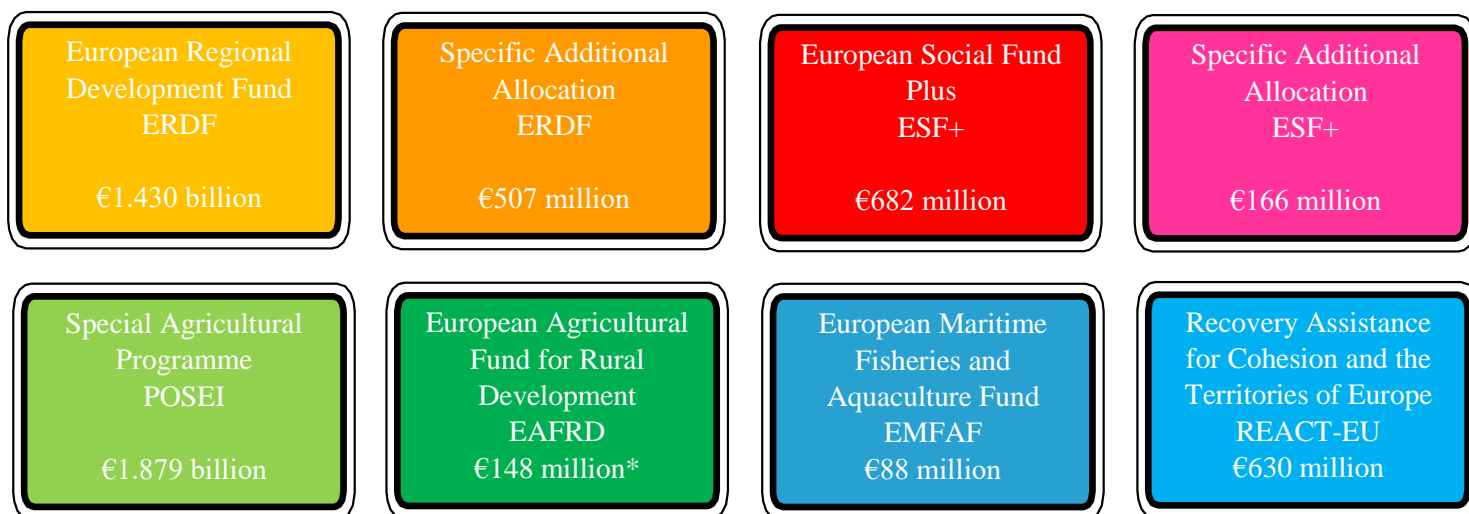

### Challenges

- **Poverty and social exclusion:** proportion of the population at risk of poverty or social exclusion is very high compared to the Spanish national average
- **Employment:** particularly high unemployment and youth unemployment rates (both much higher than the Spanish national average, and over three times higher than the EU average)
- **Economy:** high dependence on the tourism sector (35% of the GDP); economic diversification remains challenging
- **Tourism:** most negatively impacted sector of the COVID-19 crisis
- **Migration:** important migration and security challenges, with over 22,000 arrivals to the Canary Islands in 2021

### Focus areas

- **Employment:** invest in employment and training opportunities in particular for young people to improve employability
  - **Economy:** further diversify the economy, focusing on assets such as blue economy, renewable energy and tourism
  - **Tourism:** invest in transition towards sustainable and quality tourism, further strengthening the sector and protecting natural spaces and biodiversity
  - **Agriculture:** enhance the viability and competitiveness of the agriculture sector, by promoting innovative farm technologies and the sustainable management of forests
  - **Energy:** test schemes to produce renewable energy and reduce dependency (e.g. in social housing) and seize opportunities to invest in clean energy
- Transport:** test and develop sustainable transport models for short inter-island travel
- **Research and innovation:** promote research and innovation for space, marine and maritime sectors
  - **Regional cooperation:** further co-operation with neighbouring countries and territories
  - **Migration:** strengthen capacity to manage migration and integrate migrants
